PAST PERFORMANCE

Polyester Concrete Restoration

Project: 04-4Y990

Client: Caltrans (Emergency Project)

Key Features: Safety is crucial due to the explosive nature of the two components in Polyester Concrete.

Foundation

Project: Davis Service Center New Building Improvements

Prime Contractor: PGE

Key Features: Safe excavation, precise grading, compliant foundations, and beam construction per PGE standards.

Retaining Wall

Project: Operable Unit 2 - Former Napa MGP

Prime Contractor: Severson Environmental Services.

Key Features: Pouring concrete in high temperatures, protecting water evaporation to prevent cracking, and ensuring the proper cure process.

Demo unsound concrete, RSC, and Bridge removal

Project: 04-3W7504

Prime Contractor: American Civil Construction (ACC)

Key Features: Regularly test rebar for oxidation and concrete integrity; ensure rapid-set concrete reaches 3,600 psi before reopening lane.

Placing Hot Mix Asphalt

Project: Operable Unit 1 - Former Vallejo MGP Site

Prime Contractor: Severson Environmental Services

Key Features: Ensure proper grading, base compaction, quality asphalt mix, and efficient drainage installation.
